Listing of claims:

- 1. 7. (Cancelled)
- (Currently Amended) A combined oil ring comprising:

an oil ring formed into cross-section substantially of an I-shape that two rails are connected at a columnar portion thereof; and

a coil expander, which is placed in an inner peripheral groove formed on the inner side of a periphery of the columnar portion connecting the two rails of the oil ring, and which presses the oil ring radially outward,

wherein the coil expander is formed of a shape memory alloy, and is formed of anomaly wire having rectangular cross sectional shape,

a retio of a thickness and a width of the cross sectional shape of the anomaly wire, which forms the coil expander, is in a range of [[1:1.5]] 1:2 to 1:3.5,

the coll expander formed of the shape memory alloy is treated such that if a temperature of the coil expander itself is higher than a martensitic transformation temperature of the shape memory alloy, the coil expander extends in its longitudinal direction, and

the width of the oil ring in the axial direction is in a range of $\underline{1.0}$ [[0.3]] mm to $\underline{2.0}$ [[3.0]] mm.

9. - 17. (Cancelled)
